MI-RMS – What is it?

Welcome to **MIRION-RMS**

“A web-based RMS tool -
Encouraging the open
exchange of information and
ideas in radiation monitoring”

www.mirms.com

- Private Members-only (User Forum-based) RMS Communication Tool
- MGPI RMS equipment-specific product and services information
- Centralized Source for “Everything RMS” Worldwide including:
 - Events
 - Links
 - Maps/Tables/Graphs

Mirion offers an array of solutions and services for managing radiological hazards.

MI-RMS Forum Objectives

MI-RMS Forum Objectives

The **MI-RMS FORUM** provides for joint discussions by RMS professionals from around the world to exchange valuable ideas and information on products, services and applications involving radiation monitoring systems.

The FORUM allows the opportunity to discuss current RMS concerns and to clarify and establish positions on generic RMS issues and/or recommend or obtain resolutions simply by asking fellow peers that could have like equipment or experience similar circumstances. Members can seek technical help by posting a TOPIC, and asking specific advice on a problem they are currently having, or offer specific advice by explaining particular conditions and/or results that might be of benefit to other RMS professionals having related issues or problems thereby saving them needless trial and error (time and money).

These TOPICS can be about ANY type of RMS-related equipment or associated issues (including processes, functions, software, calibration, classifications, or anything RMS-related). There are a variety of FORUM CATEGORIES that we have listed that are generic/common groupings (types of discussion topics), where members can post new TOPICS that “broadly” fall into that CATEGORY heading. Members can (and we encourage them to) post their own questions and create new forum topics and/or REPLY to others that have asked a question or described a problem. This FORUM is a communication TOOL for the specific benefit and use of RMS professionals worldwide.

Mirion offers an array of solutions and services for managing radiological hazards.

NPP Maps & Tables

Knowledge Center

NPP Maps & Tables

Here, current information on nuclear power plants (U.S. and International) is provided including:

- Current NPP sites
- Planned or under construction NPPs
- License Application Status (U.S.)

Members can click on the image to see an expanded view of or click on the link provided that will take them to the website where they could find more detailed information.

Note: Please make sure popup blockers are not active so the MI-RMS website can be viewed correctly.

Calendar of EVENTS

Calendar of Events

This is a listing of specific RMS-related trade shows and conferences which specifically list (via icon) those that Mirion Technologies RMS Division is planning on either attending or exhibiting (including MI-RMS User Conferences).

MIRION USER CONFERENCES

4TH MIRION TECHNOLOGIES RMS USERS CONFERENCE

AL France
Apr 27, 2010 to Apr 29, 2010

ANNUAL RADIATION MONITORING SYSTEMS TRAINING AND BENCHMARKING SEMINAR

Marriott Harbor Beach, Jul 19, 2010 to Jul 21, 2010

TRADE SHOWS/CONFERENCES

Mirion Technologies participates in a variety of industry events around the world.

(Exhibiting/Attend)

AIR MONITORING USERS GROUP (AMUG)

Las Vegas, May 05, 2010 to May 08, 2010

NEI NUCLEAR ENERGY ASSEMBLY

San Francisco, May 17, 2010 to May 19, 2010

ENVIRONMENT, SAFETY & HEALTH EXPO

Richland, May 18, 2010 to May 19, 2010

CANADIAN RADIATION PROTECTION ASSOCIATION ANNUAL CONFERENCE

May 23, 2010 to May 26, 2010

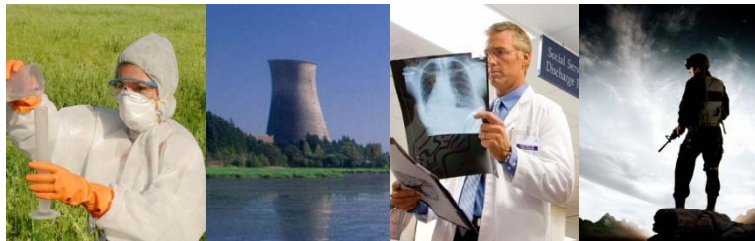

Mirion offers an array of solutions and services for managing radiological hazards.

RMS Service & Support

RMS Service & Support

A description of Mirion Technologies RMS Division standard RMS Services is described. Should there be any needs, members can make use of the CONTACT US feature.

RMS SERVICE & SUPPORT

The RMS Division of Mirion Technologies is a proud, service-oriented organization that accommodates all aspects of customer service and support and affords customers with increased peace of mind to complement standard warranties and fit their expectations. We have over 260 engineers and technicians plus highly skilled service professionals on staff to help our customers meet their operational goals. These comprehensive service and support programs are in addition to and complement our standard warranties.

Our robust program of **M**irion – **R**adiation **M**onitoring **S**ystems - "**MI-RMS**" consists of Total Care and includes:

- MAINTENANCE & FIELD SERVICE (INCLUDING SPARE PARTS & REPAIR SERVICE)
- HOT LINE CUSTOMER SUPPORT
- EQUIPMENT BURN-IN, INSTALLATION, START-UP OVERSIGHT AND IMPLEMENTATION
- TRAINING (ON SITE AND OFF SITE)
- RAMSYS PRODUCT NOTIFICATION SYSTEM
- DOCUMENTATION AND SOFTWARE SUPPORT
- BASIC (STANDARD) SERVICE AGREEMENT
- EXTENDED SERVICE AGREEMENTS
- DECAYED SOURCE RETURNS

MAINTENANCE & FIELD SERVICE (INCLUDING SPARE PARTS & REPAIR SERVICE)

Mirion Technologies RMS Division offers a full range of maintenance and field service support for radiation monitoring systems either at the plant site or back at the factory. These services allow nuclear plant personnel to achieve highly reliable and effective RMS operations with minimal down time. Our expert technical staff is available to support design changes, field modifications, or any RMS-related issue that requires technical assistance and we have a full-service hotline to support that effort. In addition to expert staff

Mirion offers an array of solutions and services for managing radiological hazards.
